SLATEQUARRY APPEAL

The Lingaun Valley Tourism Group request your help, we have started a project to document the history of the Ormonde and Victoria Slatequarries and the series of smaller quarries that straddle the Lingaun River which predate the Ormonde and Victoria quarry complexes. We hope that this ambitious project will result in the creation of two three dimensional models, one featuring the Ormonde Quarry and Cutting Sheds which feature in photographs from 1914. The second model will feature the Victoria quarry complex and associated buildings. It is intended that these models, depicting the operational quarries, will be displayed in the locality alongside large scale maps dating from when the quarries were in production and will also feature any information, photographs and artefacts which come to light. To help us with this work we are appealing to people in the communities of the surrounding area for any information, photographs, documents, maps, folklore, stories, facts and artefacts or leads on where such information may be found. We are seeking to preserve the history of the quarries and those who worked in them and create a fitting tribute in their memory. Any documents, photographs, quarry artefact, etc. which may be considered family heirlooms could, with your permission, be photographed or scanned in your home. The intention is to record and preserve the history and heritage of the Quarries before it disappears. Even the smallest item will help us to weave the story of our quarries back to life. If you have information of any kind regarding the Slatequarries and their hinterland or if you would like to be involved in this project please contact a member of our quarry project committee:
